**4 STROKE  
MOTORCYCLE OIL**

**FULL-SYNTHETIC  
4 STROKE  
MOTORCYCLE OIL**

# RAYVON 4T ATTOM

**SAE 20W-40**

High performance full synthetic lubricant developed with HI-PRO FRICTION TECHNOLOGY that reduces friction in extreme operating conditions in both clutch, gear and transmission systems. Its lower viscosity grade helps the engine work at a higher level of efficiency. Designed for Euro II or Euro III engines, with exhaust gas post-treatment systems: catalytic converters, air injection in the exhaust.

## **SPECIFICATIONS**

- **Meets Service Level:** API SN, JASO MA2

## **PROPERTIES**

- Adequate friction properties leading to better clutch operation.
- Excellent engine and piston cleanliness.
- Easy cold start, good fluidity at low temperatures.
- High temperature oxidation control that minimizes deposits.
- Extends engine life due to its excellent anti-wear protection (EP)
- Extends change periods due to its lower oil consumption.

**FULL-SYNTHETIC  
4 STROKE  
MOTORCYCLE OIL**

# RAYVON 4T SYTKOIL

**SAE 20W-50**

High-performance lubricant developed with synthetic technology and HI-PRO FRICTION TECHNOLOGY that reduces friction in extreme operating conditions in both clutch, gear and transmission systems. Designed for engines that meet the Euro II or Euro III ecological specifications, with exhaust gas post-treatment systems: catalytic converters, air injection in the exhaust.

## SPECIFICATIONS

- This lubricant has JASO MA2 approval to guarantee perfect clutch locking and prevent unwanted slipping.
- Meets Service Level: API SN

## PROPERTIES

- Excellent engine and piston cleanliness.
- Very good anti-wear protection.
- Adequate control in power transmission (EP).
- Easy cold start, quick lubrication at start-up.
- Resistance to degradation: Increased thermal and oxidation stability.
- Extends change periods due to its lower oil consumption.

**4 STROKE  
MOTORCYCLE OIL**

# RAYVON 4T SUPER

**SAE 15W-50**

Lubricant developed with HI-PRO FRICTION TECHNOLOGY that reduces friction in extreme operating conditions in both the clutch, gear and transmission systems, sharing the same supply of lubricant through the crankcase. Recommended for 4-stroke engines for motorcycles, motorbikes, tuc-tuc, motocross, enduro, scooters, motocars, choppers, ATVs and scooters of all types of brands Rayvon Super 4T 15W-50 Certified by API SN and JASO MA2.

## APPLICATIONS

- To be used in 4-stroke motorcycle and motorcar engines of all types of brands.
- It is suitable for use in transmission systems and wet clutches.

## PROPERTIES

- Better clutch operation due to its adequate frictional properties.
- Excellent engine and piston cleanliness. Optimum level of detergency at high temperatures.
- Very good anti-wear protection.
- Adequate control in power transmission (EP).
- Extends change periods due to its lower oil consumption.

**4 STROKE  
MOTORCYCLE OIL**

# RAYVON 4T SUPER

**SAE 20W-40**

Lubricant developed with HI-PRO FRICTION TECHNOLOGY that reduces friction in extreme operating conditions in both the clutch, gear and transmission systems, sharing the same supply of lubricant through the crankcase. Recommended for 4-stroke engines for motorcycles, motorbikes, tuc-tuc, motocross, enduro, scooters, motorcars, choppers, ATVs and scooters of all types of brands Rayvon Super 4T 20W-40 Certified by API SN and JASO MA2.

## APPLICATIONS

- To be used in 4-stroke motorcycle and motorcar engines of all types of brands.
- It is suitable for use in transmission systems and wet clutches.

## PROPERTIES

- Better clutch operation due to its adequate frictional properties.
- Excellent engine and piston cleanliness. Optimum level of detergency at high temperatures.
- Very good anti-wear protection.
- Adequate control in power transmission (EP).
- Extends change periods due to its lower oil consumption.

**4 STROKE  
MOTORCYCLE OIL**

# RAYVON 4T STD

**SAE 10W-30**

Lubricant developed with HI-PRO FRICTION TECHNOLOGY that reduces friction in extreme operating conditions both in the engine, as well as in the clutch, gear, and transmission systems, sharing the same supply of lubricant through the crankcase. Recommended for 4-stroke engines of motorcycles, motorcycles, tuc-tuc, motocross, enduro, scooters, motorcars, choppers, ATVs and scooters of all types of brands.

## APPLICATIONS

- To be used in 4-stroke motorcycle and motorcar engines of all types of brands.
- It is suitable for use in transmission systems and wet clutches.

## PROPERTIES

- Better sealing due to its adherence in the ring area, giving greater engine compression.
- Protection and cleanliness of the engine giving it a longer useful life.
- Better clutch operation due to its adequate frictional properties.
- Excellent protection against wear and tear of gears in the box.
- Adequate control in power transmission (EP).
- Meets the requirements of Service API SL JASO MA2

4 STROKE  
MOTORCYCLE OIL

# RAYVON 4T SCOOTER

SAE 10W-30

Lubricant developed with Anti-Friction Technology that controls friction in extreme operating conditions both in the engine, as well as in the gears and transmission. Formulated with highly refined mineral oils and special additives that provide maximum protection to the parts in contact, avoiding wear and tear of the moving parts. Meets API SL and JASO MB specification.

## APPLICATIONS

- Recommended for 4-stroke motorcycle scooter engines of all types of brands.

## PROPERTIES

- Excellent protection against gear wear and tear.
- Detergents and dispersants minimize the formation of deposits, guaranteeing the cleanliness of the engine, granting it a longer useful life.
- Provides high performance.

**4 STROKE  
MOTORCYCLE OIL**

# RAYVON 4T CLASS

**SAE 20W-40**

Lubricant developed with HI-PRO FRICTION TECHNOLOGY that reduces friction in extreme operating conditions both in the engine, as well as in the wet clutch, gear and transmission systems. Formulated with highly refined mineral oils and special additives that provide maximum protection to the parts in contact, avoiding wear and tear of the moving parts.

## APPLICATIONS

- To be used in 4-stroke motorcycle and motorcar engines of all types of brands.
- It is suitable for use in transmission systems and wet clutches.
- Recommended for 4-stroke motorbikes, motorcycles, tuc-tuc, motocross, enduro, scooters, choppers, ATVs and scooters of all types of brands.
